Posted

12/19/2025

Document Description

The Tehama GSA, in coordination with the Resource Conservation District of Tehama County (RCDTC), will be installing water system improvements to existing water and irrigation systems to facilitate sustainable groundwater use and achieve cost-effective recharge benefits. The project will involve the construction of existing water system improvements to optimize water use during all water year types. This action covers the construction-related project activities which is an element of Red Bluff GSP implementation activities to achieve long term groundwater sustainability in the Subbasin.
